

Developing APIs with Google Cloud's Apigee API Platform

Mike Dunker & Hansel Miranda
Course Developers, Google Cloud

Mike: Hi, I'm Mike Dunker, a course developer at Google.

Hansel: And I'm Hansel Miranda, also a course developer at Google.

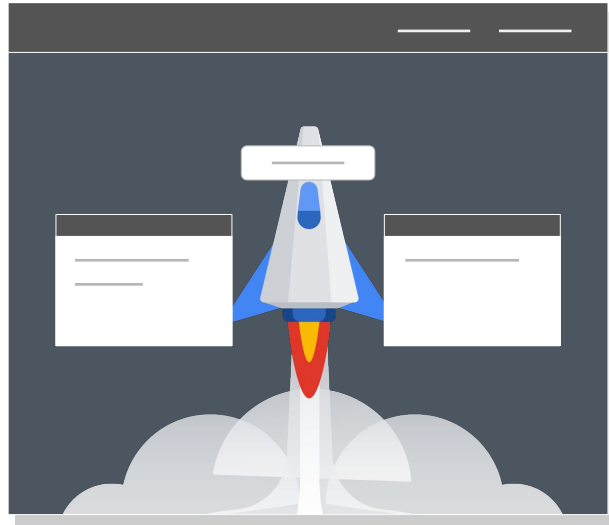

Mike: We'd like to welcome you to Developing APIs with Google Cloud's Apigee API platform.

- 1 API Design and Fundamentals of Google Cloud's Apigee API Platform
- 2 API Security on Google Cloud's Apigee API Platform
- 3 API Development and Operations on Google Cloud's Apigee API Platform

Mike: This is a series of three courses that will teach you API concepts and skills that will help you build great APIs.

Hansel: We will teach you how to use Google Cloud's full-featured API management platform, Apigee, to design, build and secure your APIs.

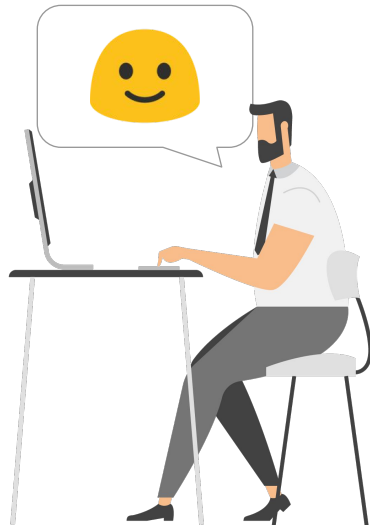

Hansel: You will also learn about how Apigee's developer portal can allow app developers to discover your APIs and register apps to use them. We will also discuss how Apigee can help you manage and grow your API program.

Mike: These courses are not just about how to use Apigee. These courses are also focused on the skills required of an API Engineer. You will learn how to design APIs that follow best practices. You will learn about API security concerns and how to mitigate them. You will also learn how to productize your APIs.

Hansel: These courses are intended for a technical audience. You will build an API from the ground up, completing a series of labs. Many of the labs build on each other, adding more features and security to your API. It is recommended that you take all three courses in order, and complete the labs in order.

Mike: These courses cover a wide range of topics, and the information may sometimes feel overwhelming. Take your time to absorb the content, and make sure that you understand both the lectures and labs.

- 1 API Design and Fundamentals of Google Cloud's Apigee API Platform
- 2 API Security on Google Cloud's Apigee API Platform
- 3 API Development and Operations on Google Cloud's Apigee API Platform

Mike: When Hansel and I joined Apigee, we started with zero knowledge of Apigee and minimal knowledge of APIs.

Hansel: We learned how to be API engineers during years of helping companies build their APIs and API programs.

Mike: This course teaches you the skills, knowledge, and best practices that we've found most important for API engineers.
